

Linking Study: Predicting Performance on Kentucky K-PREP Reading and Math Assessments using Classworks Universal Screeners

November 2022

About This Whitepaper

Classworks conducted a study to determine if the Classworks Universal Screener assessments can predict achievement on end-of-year Kentucky K-PREP assessments. Data was collected from over 9,000 students across 23 districts throughout the 2021-2022 school year.

Introduction

Understanding where students are with their learning and how they may perform helps you make informed decisions about students' interventions. Assessments that identify students at risk or in need of interventions better prepare you to support those students and give them the best opportunity to close gaps.

The objective of this linking study is to reveal whether Classworks Universal Screener Reading and Mathematics assessments help predict performance on the Kentucky K-PREP End-of-Grade assessments in reading and mathematics in grades 3 through 8.

Main Findings

Results from the linking analysis revealed that Classworks Universal Screeners are accurate predictors of the KY K-PREP assessments, meaning as a Kentucky educator you can use Universal Screener scores to:

1. Identify students likely to miss reading and math yearly progress goals with enough time to make meaningful adjustments to interventions well before the year-end test.
2. Predict the percent of students who will fall into the Proficient (Proficient and Distinguished learners) or Non-proficient (Novice and Apprentice learners) categories on the Kentucky K-PREP to help district and building administrators plan resources and support accordingly.

Reading

Predictive Accuracy of Universal Screener and Kentucky K-PREP

The objective of our model was to measure how accurately the Classworks Universal Screener assessment scores predicted whether students were classified as proficient or non-proficient on the Kentucky K-PREP in the subject of reading. Findings show that the Classworks Universal Screener reading assessments are accurate predictors of performance on Kentucky K-PREP reading assessments. On average, students were correctly classified 85% of the time.

Predictive Accuracy for KY K-PREP to Universal Screener

Subject: Reading

Impact of Classworks on Universal Screener Growth

When looking at the results of Universal Screener Reading assessments from fall 2021 to spring 2022, analysis shows students in benchmark grades who followed Classworks recommended usage achieved substantially more growth when compared to students who had no usage. Across these benchmark grades analyzed, Classworks users experienced an average of 5.93 growth points more in reading than their peers.

Comparison of Growth Between ILP and Non-ILP Users

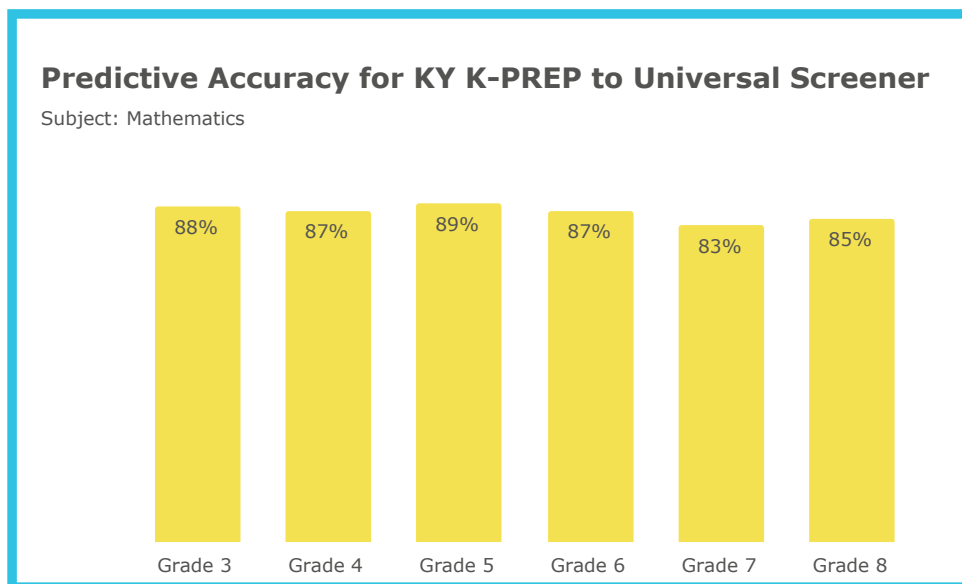

ILP Users achieved more growth points on the Reading Screener than Non-ILP Users from Fall 2021 to Spring 2022.

Mathematics

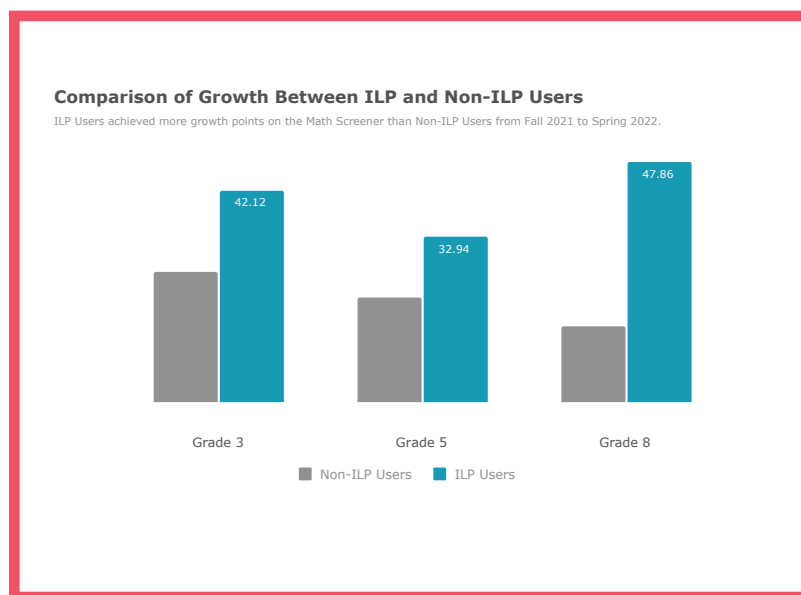

Predictive Accuracy of Universal Screener and Kentucky K-PREP

The objective of our model was to measure how accurately the Classworks Universal Screener assessment scores predicted whether students were classified as proficient or non-proficient on the Kentucky K-PREP in the subject of mathematics. Findings indicate that the Classworks Universal Screener math assessments are accurate predictors of Kentucky K-PREP math assessments. On average, students were correctly classified 87% of the time.

Impact of Classworks Instruction on Universal Screener Growth

When looking at the results of Universal Screener Mathematics assessments from fall 2021 to spring 2022, analysis shows students in benchmark grades who followed Classworks recommended usage achieved substantially more growth when compared to students who had no usage. Across these benchmark grades analyzed, Classworks users experienced an average of 20.39 more growth points in math than their peers.

Conclusions

The findings show there is a relationship between Classworks usage and growth reflected on the Classworks Universal Screener. Recommended usage includes an average unit score of 75% or higher, 10 or more units completed, and at least 15 minutes a week over 30 instructional weeks in both reading and math.

In addition, there is a high predictive accuracy between the Classworks Universal Screener assessments and the Kentucky K-PREP assessments in Reading and Mathematics. Therefore, students using Classworks may experience more growth on their Universal Screener assessments and, in turn, on their end of grade Kentucky K-PREP assessments.

About Classworks

Since 2003, millions of students have used Classworks to close learning gaps, keep pace, and grow!

Our mission is to deliver the most compelling individualized learning experience that helps teachers create an equitable learning environment for students of all abilities and ethnic and social backgrounds.

POWERFUL INSTRUCTION. PERFECT TIMING.
